Basic Info

Model No.: H-TC250

Plate: Relief Printing

Color & Page: Single-Colour Printing ...

Species: Intermittent

Temperature Control: Heater Tube, A...

Foil Collecting: Automatically Collecting

HS Code: 8443198000

Additional Info

Packaging: Wooden case

Productivity: 100 Sets/month

Brand: KC

Transportation: Ocean

Place of Origin: Dongguan

Supply Ability: 100 Sets/month

Certificate: CE

Product Description

Pneumatic Hot Stamping Machine // Usage and characters

Supplier

C

- Gilding - paper, leather, wood, plastic,
- Baked - wood products, baked painting, gift box packaging;
- Embossing - paper, leather, cloth.
- Flat-object stamping machine with large-pressure, Suitable for stamping on invitation letter, card. Leather, wooden gift, Paper package, Plastics film, Electron products;
- Manual. Automatic feed foil, automatic temperature controlling ensures stamping quality.
- Because of large pressure, It is suitable for gilding and baking Impression on leather, paper, wooden materials.

- Pneumatic drive, pressure large.

Application fields

- Paper Gilding, Leather Impression, Wood ware Baking
- Paper Concave-convex embossing, Cloth hot stamping,
- Plastics Bronzing
- Mobile screen, Household appliances Panel , Thick paper card, PVC board Etc. large dimension Flat substrate stamping and Bronzing.
- Woodiness objects baking-burns and Impress;
- Leather bronzing and Molding;
- Paper products concavo indentation.
- Graduated disc of clock bronzing.

Pneumatic Hot Stamping Machine //Parameter

H-TC180

- Hot plate area:150× 200 mm
- Working table area:200 ×250mm
- Max printing pressure:2,000-3000 Kg
- Up and down distance:180mm
- Heat wattage:1200W
- Foil in feed: Motor Drive
- Temperature adjustment:0-300oC .

H-TC250

- Hot plate area:250 × 300 mm
- Working table area:300 ×350mm
- Max printing pressure:2,000-3000 Kg
- Up and down distance:180mm
- Heat wattage:1600W
- Foil in feed: Motor Drive
- Temperature adjustment:0-300oC

Certificate: CE

Pneumatic hot stamping machine //Advantage

- Table can be pulled into and pulled out the pick and place of convenience products;
- Table can be up and down, around, before and after the precision adjustment, to facilitate the adjustment of the precise location of the gilt;
- Table lifting screw adjustment, simple and convenient;
- Relays for process control, stable operation, easy maintenance;
- The use of advanced temperature control system, the temperature can be set freely, high precision temperature control, with automatic temperature control;
- leveraged cylinder pressure, the pressure is uniform and strong;
- The basic parameters of the hot stamping process; temperature, pressure, hot pressure, the rolls of time in accordance with the process requirements of the flexible adjustment;
- Motor to control the delivery of the gold foil paper, resin length can be flexibly adjusted according to the size of the stamping area;
- Using high strength steel, gilt plate and table, has a very high flatness;
- Heating tube for heating, heat supply is stable, easy to replace
