Details

Confirming the preference

Kortho's Hot Quickcoder is a flexible contact coder system that makes a perfect print on both stationary and moving products and materials.

The perfect solution for packaging lines with high production speeds. Kortho's Hot Quick coder offers you simplified installation for diverse types of machinery. Vertical filling machines, flow wrap machines, belt conveyors (filling lines), carton machines, etc.

Print accuracy

The Hot Quick coder prints at speeds up to 250 prints per minute. Fast, accurate, reliable. Ideal solution for small text prints like: dates, prices, expiration dates, company logos and special logos like recycling and EG – signature.

Fulfills any need

Where do you need to print? The print stand allows you to position the Hot Quickcoder in any position you wish and at any angle. The big sales volume of this particular machine proves that the product is highly rated by our current distributors.

The Butterfly touch

Our unique wax system prints on objects in a fraction of a second. This makes the speed of 250 prints per minute, looks effortless for the Hot Quickcoder.

On any surface

Kortho's hot quick coder gives clear, accurate and sharp prints on both porous and non-porous materials. An instant dry print directly on materials such as: packaging film, paper, glass and plastic bottles, cans and cardboard and many others.

Text capabilities

Fixed text, individual characters and/or logo can be placed in the special holder. Easy and fast, the holder is changed within seconds.

Digital Control System

The control system is equipped with 8 presets. It allows you to specify the parameters for printing on various products and materials. So no more searching for the ideal setting. Just select the appropriate preset!

kortho

Hot Quickcoder

10.000 or 100.000 prints per day? You need them? You have them!

With Kortho's Hot Quickcoder, quantity restrictions do not exist!

Kortho's Hot Quickcoder is the solution which gives you the freedom to print large and small quantities of prints, anytime, anyplace. Up to three lines of text, in printing area of 12x24 mm, the unique printhead even allows you to make a perfect print on moving objects, without any changes in the quality level.

The preheating function of the back up Hotroll enables you to change the empty Hotroll with a new one, with a minimal interruption of the process and no waiting time.

The advantages:

- Instant dry, sharp and clean print results on both porous and non-porous by the proven solid ink technology.
- Coding on continuously moving objects is possible with our unique jumping head with "Butterfly touch".
- High speed printing of up to 250 prints per minute, at a maximum speed of 60 meters per minute.
- Text changeable in seconds by prepared interchangeable text holder.
- No waiting time when changing the empty Hotroll, the new one is preheated and in stand-by position in the incorporated pre-heating unit.
- Change the printing color by simply replacing the Hotroll with a colored one.
- Simple-to-use, four button menu controller.
- Clean and maintenance free use.
- LCD screen with back ground lighting for optimal display clearance.
- Clean and maintenance-free operation. No special training required.
- With 8 different presets for optimal settings for each product.
- Installation position in any needed position due to the perfect stand design.

**The advantages
do not end...**

Go for a Dutch brand
